Payment terms – please ensure payment is made before event date. Cancellation policy – a charge of 50% is payable if the booking is cancelled less than 14 days in advance of the event. The full amount is payable if the booking is cancelled less than 7 days in advance.

passivhaus or perverse house

an enlightened investigation comparing
energy assessment methodologies

27 February 2013

PTEa

Diespeker Wharf, 38 Graham Street, London N1 8JX

- Is SAP fit for purpose?
- Is Part L missing the point?
- Is passivhaus a viable methodology/standard?

SPECIAL OFFER
*book 3 places for the
price of 2!*

About The Seminar

This one day seminar takes a good hard look at passivhaus standards and assesses them against other more commonly used standards such as SAP, Part L of the Building Regulations and the Code for Sustainable Homes.

Using a range of up-to-date case studies - both residential and non-residential - speakers will demonstrate that the passivhaus standard can produce some exemplar buildings whilst Part L and SAP can have some less desirable outcomes.

The first speaker **Mark Saich** (building control professional and director of Green Building Solutions) will give a concise and critical review of passivhaus, SAP and Part L, highlighting the pros and cons and how they can deal with wider environmental issues.

Presentations follow from **James Anwyl** of Eurobuild, **Paul Gannaway** of Betteridge and Milsom (quantity surveyors) and **Richard Hawkes** (Hawkes Architecture - Crossway featured on Grand Designs) who all share their experiences of building to passivhaus standards. The speakers will explain where they have employed other standards and how some of the outcomes are not necessarily what was expected.

Mark finishes up the day with an overview of the EnerPHit standard, used for retrofitting building to best practice energy efficiency standards.

Be prepared to learn a lot, enjoy some healthy debate and come away armed with a clear view of how all the energy and environmental building standards measure up against each other.

It's easy to become a member of The Green Register!

By attending two days of Green Register training (this course gets you half way there) you become eligible for membership

Enquire about membership today: call 0117 377 3490 or email mail@greenregister.org.uk.

About The Speakers

Mark Saich is a trainer and sustainability consultant and Director of Green Building Solutions. He regularly speaks at RICS, RIBA and Green Register events on a range of issues including Part L and sustainable construction. In 2006 was part of the team training building control professionals on the then new part L on behalf of the DCLG.

James Anwyl is Managing Director at Eurobuild. He was awarded the Happold Scholarship in 2009 by the CIOB and Buro Happold for his design of one of the first Code Level 6 Sustainable Homes. Trained as an assessor in the PassivHaus Planning Package (PHPP) and as a BREEAM assessor, he is also a beta tester and customer advisor to Graphisoft on the development of building performance software and BIM.

Paul Gannaway is Surveying Director at Betteridge and Milsom. Paul first joined Betteridge & Milsom in 1989 and has progressed his career through the company, becoming a Director in 2007. He manages a team of Surveyors within his department, as well as running a number of projects himself.

Richard Hawkes is founding Director of HAWKES Architecture Ltd, which was established in 2008 following the success of building the Crossway Passive House in Kent. Crossway featured on Grand Designs in 2009. Much interest followed which then led Richard to specialise in the design of pioneering contemporary, low carbon sustainable buildings and 'eco' refurbishments.

What have delegates said about previous events?

"Really good pace and well presented, kept our attention all day!"

"Exactly the right balance of technical content and clear presentation"

"Really excellent & seamless. expansive knowledge"
